## PROFESSIONAL SUMMARY

Full-stack engineer (backend-heavy) with 3.5 years shipping production Node.js / TypeScript systems across multi-tenant SaaS, AI integration, and IoT domains. Builds and owns features end-to-end: Node.js services, PostgreSQL + Prisma schemas, React interfaces, and production deployments. Shipped LangChain + LangGraph agentic workflows and RAG pipelines in production at V-Align - not demos. Currently sole backend engineer on Terrisage, a 0-to-1 B2B real estate CRM live on App Store + Play Store with full test pyramid, Sentry observability, and webhook pipelines for Meta Ads and MagicBricks.

## CORE COMPETENCIES

Node.js + TypeScript

PostgreSQL + Prisma

LangChain / LangGraph (AI Integration)

RAG Pipeline Design

React 18+ / Next.js

Docker + AWS

GraphQL API Design

Multi-Tenant SaaS Architecture

## SKILLS

**Languages:** TypeScript, JavaScript, Python, Ruby    **Backend:** Node.js, Express, NestJS, Rails, Apollo GraphQL, Prisma, REST APIs  
**Frontend:** React 18+, Next.js, Redux, TanStack Query    **Databases:** PostgreSQL, MongoDB, InfluxDB  
**AI Integration:** LangChain, LangGraph, RAG, OpenAI APIs, Whisper, Prompt Engineering  
**Infrastructure:** AWS (EC2, S3, API Gateway), Docker, Kubernetes (exposure), CI/CD, Git  
**Observability:** Jest, Supertest, Maestro E2E, Sentry, Uptime Robot

## WORK EXPERIENCE

V-Align Technologies Pvt Ltd Jan 2024 - Present

### Full Stack Engineer (Backend-Heavy) - Bengaluru, India

- Agentic AI Integration:** Shipped LangChain + LangGraph document generation agent (RAG pipeline over knowledge base) increasing proposal throughput from 4 to 7 per week; integrated OpenAI Whisper for speech-to-text capture, cutting initial data entry time by 25%.
- Multi-Tenant SaaS Platform:** Architected backend (Rails, GraphQL, PostgreSQL, Next.js) with tenant-scoped RBAC and data isolation; built Razorpay recurring billing integration reducing manual ops by 60%.
- ETL + Data Pipeline:** Orchestrated Airflow ETL pipelines processing 20K+ records/day for cross-tenant data synchronization.
- Infrastructure:** Deployed via Docker on AWS EC2 + API Gateway, reducing deployment time from hours to minutes.
- MSME Platform:** Delivered mobile-responsive assessment platform (Next.js, Node.js, PostgreSQL), reducing report generation from 60 minutes to under 10 minutes.

Digital Blanket (formerly Flamencotech Pvt Ltd) Aug 2022 - Jan 2024

### Full Stack Developer - Bengaluru, India

- Built real-time IoT monitoring platform with WebSocket dashboards (React, Redux), device integration (Raspberry Pi, ESP32, MQTT, Telegraf, InfluxDB) enabling sub-second ingestion for people-counting and air-quality monitoring.
- Optimized time-series query layer, improving dashboard load time by 30%.

PROJECTS

Terrisage - B2B Real Estate CRM 0-to-1 | Live

Node.js | TypeScript | PostgreSQL | Prisma | GraphQL | AWS | React Native

- Built complete backend from 0 to 1 as sole engineer; single GraphQL API (Node.js + Prisma + PostgreSQL) serving React Native mobile app and web CRM - live on App Store + Play Store.
- Multi-tenant architecture with scoped RBAC + data isolation; webhook pipelines for Meta Ads, MagicBricks, and 99acres for automated lead capture and routing.
- Integrated OpenAI voice-to-text for agent notes and GPT-generated property descriptions from structured inputs.
- Full test pyramid: 90+ Jest / Supertest backend suites, Maestro E2E, Sentry tracing, Uptime Robot monitoring.

LiftUP - Gym Management SaaS Live Demo

Node.js | TypeScript | PostgreSQL | Next.js | Docker

Multi-tenant backend with scoped data isolation and RBAC; membership and workout management REST APIs supporting 500+ members across tenants at 99.5% uptime.

ACHIEVEMENTS

- 400+ DSA problems solved (LeetCode + GFG)
- Shipped 15+ 0-to-1 features across production SaaS teams
- Led backend engineering for 2 production B2B SaaS products simultaneously
