PROFESSIONAL SUMMARY

Backend engineer (NestJS / Node.js / TypeScript) with 3.5 years building production B2B SaaS systems at early-stage companies. Ships backend features end-to-end with strong emphasis on code quality: multi-tenant PostgreSQL schemas, RBAC, REST and GraphQL APIs, full test pyramids (Jest / Supertest / Maestro E2E), Sentry observability. Currently sole backend engineer on Terrisage, a live B2B CRM (App Store + Play Store). At V-Align, built multi-tenant SaaS platform and shipped LangChain + LangGraph agentic workflows in production -- a rare differentiator at the SDE2 level.

CORE COMPETENCIES

NestJS + Node.js + TypeScript

PostgreSQL + Prisma

Multi-Tenant SaaS Architecture

Test Pyramid (Jest / Supertest / E2E)

React 18+ / Next.js

Docker + AWS

GraphQL + REST API Design

LangChain / LangGraph (AI Integration)

SKILLS

Languages: TypeScript, JavaScript, Python, Ruby **Backend:** Node.js, NestJS, Express, Rails, Apollo GraphQL, Prisma, REST APIs
Databases: PostgreSQL, MongoDB, InfluxDB **Frontend:** React 18+, Next.js, Redux, TanStack Query
AI Integration: LangChain, LangGraph, RAG, OpenAI APIs, Whisper, Prompt Engineering
Infrastructure: AWS (EC2, S3, API Gateway), Docker, CI/CD, Git
Quality + Observability: Jest, Supertest, Maestro E2E, Sentry, Uptime Robot

WORK EXPERIENCE

V-Align Technologies Pvt Ltd Jan 2024 - Present

Full Stack Engineer (Backend-Heavy) - Bengaluru, India

- Multi-Tenant SaaS Platform:** Architected backend (Rails, GraphQL, PostgreSQL, Next.js) with tenant-scoped RBAC and data isolation; built Razorpay recurring billing integration reducing manual ops by 60%.
- AI Feature Delivery:** Shipped LangChain + LangGraph agentic document generation pipeline (RAG over knowledge base) increasing proposal throughput from 4 to 7 per week; integrated OpenAI Whisper for speech-to-text capture.
- ETL + Data Pipeline:** Orchestrated Airflow ETL processing 20K+ records/day for cross-tenant data synchronization with full error handling and retry logic.
- Infrastructure + Quality:** Deployed via Docker on AWS EC2 + API Gateway; full CI/CD pipeline; production-stable with Sentry monitoring and structured logging.
- MSME Platform:** Delivered mobile-responsive assessment platform (Next.js, Node.js, PostgreSQL), reducing report generation from 60 minutes to under 10 minutes.

Digital Blanket (formerly Flamencotech Pvt Ltd) Aug 2022 - Jan 2024

Full Stack Developer - Bengaluru, India

- Built real-time IoT monitoring platform with WebSocket dashboards (React, Redux), device integration (Raspberry Pi, ESP32, MQTT, Telegraf, InfluxDB) enabling sub-second ingestion for people-counting and air-quality monitoring.
- Optimized time-series query layer, improving dashboard load time by 30%.

PROJECTS

Terrisage - B2B Real Estate CRM 0-to-1 | Live

Node.js | TypeScript | PostgreSQL | Prisma | GraphQL | AWS | React Native

- Built complete backend from 0 to 1 as sole engineer; single GraphQL API (Node.js + Prisma + PostgreSQL) serving React Native mobile app and web CRM -- live on App Store + Play Store.
- Multi-tenant architecture with scoped RBAC + data isolation; webhook pipelines for Meta Ads, MagicBricks, and 99acres for automated lead capture and routing.
- Full test pyramid: 90+ Jest / Supertest backend suites, Maestro E2E -- caught 3 critical regressions before production. Sentry tracing and Uptime Robot monitoring.
- Integrated OpenAI voice-to-text for agent notes and GPT-generated property descriptions from structured inputs.

LiftUP - Gym Management SaaS Live Demo

Node.js | TypeScript | PostgreSQL | Next.js | Docker

Multi-tenant backend with scoped data isolation and RBAC; membership and workout management REST APIs supporting 500+ members across tenants at 99.5% uptime.

ACHIEVEMENTS

- 400+ DSA problems solved (LeetCode + GFG)
- Shipped 15+ 0-to-1 features across production SaaS teams
- Led backend engineering for 2 production B2B SaaS products simultaneously
