PROFESSIONAL SUMMARY

Backend SDE with 3.5 years designing and shipping **distributed backend systems**, **multi-tenant platforms**, and **scalable APIs** across B2B SaaS and product engineering. Owned full backend architecture from scratch as sole engineer on multiple production systems — multi-tenant data isolation with RBAC, a single GraphQL API serving two clients simultaneously, and ETL pipelines processing **20K+ records/day**. Strong in **system design (HLD/LLD)**, data structures & algorithms (400+ LeetCode/GFG problems), and fintech-adjacent engineering (Razorpay recurring billing with idempotent webhook handling). Currently shipping Terrisage, a live B2B real estate CRM, from 0→1 as sole backend engineer. Expanding into **Golang** to broaden platform engineering capability.

CORE COMPETENCIES

Distributed Systems Design	Multi-tenant Architecture & RBAC	Scalable API Design (GraphQL/REST)
System Design (HLD/LLD)	ETL Pipeline Orchestration	Payment & Billing Systems
DSA — 400+ LeetCode/GFG	Fintech-adjacent Engineering	

WORK EXPERIENCE

V-Align Technologies Pvt Ltd

Jan 2024 – Present

Full Stack Engineer (Backend-Heavy) · Bengaluru, India

MULTI-TENANT SAAS PLATFORM

- Architected **multi-tenant SaaS backend** (Rails, GraphQL, PostgreSQL) with tenant-scoped RBAC and data isolation, serving 5+ enterprise clients on a shared platform with zero cross-tenant leakage — increased operational output by 75%.
- Orchestrated **Airflow ETL pipelines** processing 20K+ records/day for cross-tenant data synchronisation, built for idempotency and failure recovery — distributed systems ownership end-to-end.
- Built **Razorpay recurring billing integration** with idempotent webhook handling and failure retry logic, reducing manual billing operations by 60% — fintech-grade reliability on the payments layer.
- Deployed via Docker on AWS EC2 + API Gateway; reduced deployment cycle from hours to minutes through containerised CI/CD.

AGENTIC AI PROPOSAL AUTOMATION

- Engineered agent-driven document generation (LangChain, LangGraph, RAG) increasing proposal throughput from 4 to 7 per week; integrated OpenAI Whisper for speech-to-text, reducing data entry time by 25%.

MSME SELF-ASSESSMENT PLATFORM

- Delivered mobile-responsive assessment platform (Next.js, Node.js, PostgreSQL), reducing report generation from 60 minutes to under 10 minutes.

Digital Blanket (formerly Flamencotech Pvt Ltd)

Aug 2022 – Jan 2024

Full Stack Developer · Bengaluru, India

- Built real-time IoT monitoring platform — dashboards (React, Redux, WebSockets, InfluxDB) with device integration (Raspberry Pi, ESP32, MQTT, Telegraf) enabling sub-second data ingestion for people counting and air quality tracking.
- Optimised time-series query layer, improving dashboard load time by 30%.

PROJECTS

Terrisage — B2B Real Estate CRM PRODUCTION · 15+ B2B CLIENTS

Built complete backend from 0→1 as sole engineer. **Multi-tenant architecture** with scoped data isolation and RBAC for B2B real estate teams; single **GraphQL API** serving both React Native mobile app and web CRM. Integrated webhook pipelines for Meta Ads, MagicBricks, and 99acres for automated lead capture. Added OpenAI-powered voice-to-text and GPT property descriptions. Full test pyramid — 90+ Jest/Supertest backend suites, React Native Testing Library, Maestro E2E — with Sentry tracing and Uptime Robot monitoring.

Node.js · TypeScript · PostgreSQL · GraphQL · AWS EC2/S3 · App Store · Play Store

LiftUP — Gym Management SaaS LIVE DEMO

Multi-tenant backend with scoped data isolation and RBAC across gym tenants. REST APIs for membership and workout management supporting 500+ members across tenants at 99.5% uptime. Demonstrates the same multi-tenant platform pattern as production work at V-Align.

Node.js · TypeScript · PostgreSQL · Next.js · Docker

EDUCATION

Full Stack Web Development — Masai School	2022
Bachelor's Degree	2021

CERTIFICATIONS

AI Engineering — Progression School	2025
-------------------------------------	------

SKILLS

- Languages:** TypeScript, JavaScript, Python (production), Ruby, Golang (learning)
- Backend:** Node.js, Express, Rails, GraphQL, Apollo GraphQL, Prisma, REST APIs
- Databases:** PostgreSQL, MongoDB, InfluxDB **Distributed Systems:** Airflow, Webhook pipelines, MQTT, WebSockets
- AI Integration:** OpenAI APIs, LangChain, LangGraph, RAG, Whisper
- DevOps:** AWS (EC2, S3, API Gateway), Docker, CI/CD, Git
- Testing & Observability:** Jest, Supertest, React Native Testing Library, Maestro, Sentry, Uptime Robot
- DSA:** 400+ problems — LeetCode & GFG (Trees, DP, Graphs, Sliding Window, BFS/DFS)
